7. Database Description and Contents: *(Provide a brief narrative summary of the purpose for which the database is maintained in support of the business of state government and a description of the general contents of the database. Indicate known restrictions to public access.)*

VIPERS is a pressure vessel object inspection management and decision support system designed to meet the mission requirements of the Department of Labor and Industry's Boiler Safety Compliance Office. The database maintains a list of registered vessels, their owners and users, date of last inspection, who insures the vessels, and location of the vessels. All other information is restricted release information. The current database is comprised of three tables. This database is currently being redesigned; the new system will have 23 tables and use a true relational database management system.

Note: Specific information relating to data fields, record/table layouts, and known restrictions to public access is maintained by the public body. Please contact the point of contact noted in Item 4 for further details.
